

THE UNIVERSAL SHELTER

The universal shelter has been introduced as an affordable and adaptable field building. It can be used for a multitude of purposes and is of very robust construction. Although it can be used as a field, site or bus shelter, it is also ideal for livestock to shelter from the inclement elements. The standard unit is L4.0m xW2.4m and the height is 2.4m (front) and 2m (rear). No floor is provided on the standard unit as livestock would require a solid easy-clean base. A raised wood floor can be supplied if required. Any size in multiples of 1.2m can be supplied, price on request. The Universal shelter is well made and finished with an attractive shingle roof.

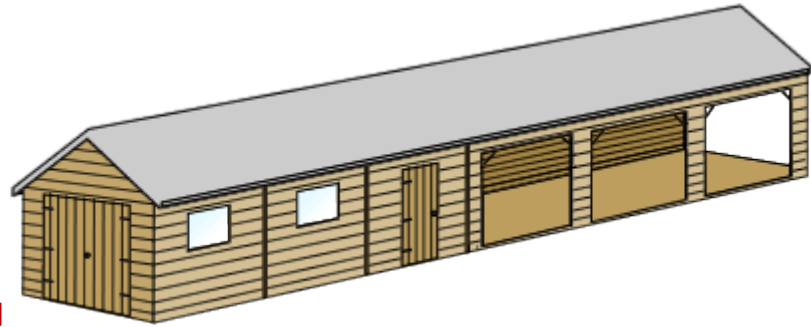

STABLES: Our stable buildings are designed to last and can be made to clients own specifications. Please contact us for details and prices.

If you are considering one or more field or yard buildings look at our next page. The combination building can be anything you want it to be as this is a 'mix and match 'system, designed to give you exactly what you require.

COMBINATION BUILDINGS:

Contact us and discuss your needs, or send us a sketch with sizes and an idea of the project that you are considering and we will get back to you as quickly as possible.

See some examples below.

COMBINATION

BUILDINGS

Buildings can be supplied for any purpose and our unique “COMBINATION BUILDING “system allows us to match and marry any type of field or yard shelter. A stables + tack-room+ workshop or shelter +feed-store+ machine shed. ANY combination - you decide.

WHATEVER YOUR REQUIREMENT SEND YOUR ENQUIRY FOR IMMEDIATE QUOTE - No Obligation & No Salesmen
